PAUL KING - ARCHITECT

B.Bsc, B.Arch (hons), ANZIA

OBJECTIVES With a background of academic success and a good seasoning period of solid practical experience, Paul King now seeks and enjoys opportunities to originate and collaborate on design of the highest quality and to add value wherever the opportunity arises, whether in architectural competition work or "real world" projects.

His passion for design is complemented by a drive to creatively develop and lead in an arena where few Architects or Designers are yet truly comfortable - the skilled use and integration of computer aided design visualisation and documentation technologies, and their use to remove the traditional barriers between conceptualisation vs. realisation of design - enabling ever greater efficiency and effectiveness, and the best possible outcomes for the client.

EXPERIENCE 1998–Present **Architecture Prime** **Christchurch, NZ**

Director of own practice providing services directly to the public, as well as outsourced design, contract documentation and presentation services to other Architects. Wide range of project types undertaken including healthcare, educational, retail, commercial and domestic work. Demonstrated capacity to single-handedly address sizable projects, (recently the design, presentation and full working drawings for a 29 unit apartment complex), as well as work within project teams for larger scale projects.

Emphasis on operating at the forefront of technology, producing integrated design, design communication/marketing and documentation outcomes using ArchiCAD, Artlantis, Photoshop, PowerPoint and other software packages. Active contributor as an official New Zealand Beta Tester in the evolution of successive releases of ArchiCAD, Artlantis and other design & visualisation software tools.

Marketing, administration and CPD activities for own practice, and participation on the NZIA Canterbury Branch Committee

1997–1998 **Tutoring / Contract work** **Christchurch, NZ**

Primarily tutoring in MicroStation, ArchiCAD and design courses to applied technology students at Christchurch Polytechnic. Four months contract work at Barclay Architects. Prepared private design submission for the new proposed Christchurch Art Gallery. Miscellaneous private projects

1993–1997 **Architecture Warren & Mahoney** **Christchurch, NZ**

Involved in a wide range of projects including: a \$1.3M penthouse apartment fit out, a recycled materials Arts & Crafts style house, developer terrace houses, glass & steel canopies, a number of healthcare projects, as well as scheme design submissions for institutional clients and competition work. Professional role primarily consisted of design development, consent & contract documentation, consultant coordination and site queries/contract admin. - both independently, and as part of a team.

Drawn documentation almost all MicroStation based. Implementation characterized by active ongoing exploration of new methods and systems, resulting in a deep level of CAD and computer systems knowledge and ability. Outcomes include 3D modeling and animation.

Attained Registration as an Architect in December 1997

INTERESTS The design of virtual environments, rock climbing, fitness, computers & information technology, investment property.
